Prison populations are influenced by commitments and length of stay. Commitments have primarily driven the RIDOC's population, as length of stay has remained relatively stable. When commitments exceed/fall below releases, we often see an increase/decrease in the population. The graph on the next page demonstrates how commitments are linked to changes in the population.

right, while commitments and releases are plotted on the primary axis to the left.

Fun Facts

- The average age of those committed and released was 33.
- 56% of those committed and released were White, 25% were Black and 17% were Hispanic.
